

Start	Session #	Presenter	Title	Abstract
8:00	Breakfast	SCUG	Breakfast for Attendees	
9:00		SCUG	Welcome & Opening Remarks	
9:15	1	Oracle	Blueprint 4D Summary for JD Edwards	Join us as Paul Houtkooper and Jon Green provide updates for JDE from the June Blueprint 4D conference in Las Vegas, NV.
10:00	2	ACCO Engineered Systems	Getting Creative with UDOs Saves You Time and Money	In this session, we will share examples of enhancements we've built that make business processes faster, easier, and more consistent for our business constituents. Some of our Use Cases are designed to make things easier (fewer clicks); others ensure the proper system process is followed, and all use cases save time and increase efficiency. Whatever your objective, getting creative with UDOs can make a valuable difference to your business constituents.
10:45	Break			
11:00	3	Cloud Inventory	The Hidden Heartbeat of your Business	Organizations face a lot of different issues today. Sometimes, however, issues can hide in plain sight and look like something completely different. In this session, we are going to focus on identifying the symptoms of an INVENTORY MANAGEMENT problem that could be hiding as a procurement issue, an equipment issue, or a process issue. We will dive into root causes of inventory management problems both from inside and outside the four walls.
11:30	4	Denovo	Three Simple Things: Thriving in Times of Uncertainty	In an era defined by rapid change and constant disruption, thriving—not just surviving—requires clarity, agility, and a focused approach. "Three Simple Things: Thriving in Times of Uncertainty" explores how organizations can navigate uncertainty by embracing three powerful yet practical strategies. First, Enterprise-Document Understanding empowers teams to extract actionable intelligence from unstructured content, turning documents into strategic assets. Second, Low Code/No Code platforms accelerate innovation by enabling faster, more flexible solution development—democratizing technology and reducing reliance on scarce developer resources. Finally, UX-One Pages & Process Models simplify complexity by aligning user experience and process design, helping stakeholders see the big picture and act decisively. Together, these three approaches offer a grounded roadmap for operational resilience and digital adaptability in uncertain times.
12:00	Lunch	SCUG		

1:00	5	C&A Technology	JD Edwards Orchestration Bootcamp	The JDE Orchestration Bootcamp is designed to empower users how to automate business processes and integrate external systems using the JDE Orchestrator. Participants will gain practical skills how to create, test, and deploy orchestrations that enhance efficiency, reduce manual effort, and improve system connectivity. The workshop emphasizes real-world use cases for optimizing JD Edwards functionalities. CAT will walk through various use cases for implementing an orchestration strategy
1:30	6	KS2	Be First. Be Ready. Release 25 Upgrade Lessons from the Front Line	Be among the first to hear what it really takes to upgrade to JD Edwards EnterpriseOne Release 25. In this session, KS2 Technologies shares how we partnered with RectorSeal to execute one of the industry's first successful R25 upgrades — on time, with minimal disruption, and measurable business value.
2:00	7	ERP Suites	Smarter Analytics in JD Edwards: Detecting Anomalies and Insight with AI	AI isn't just a buzzword—it's a powerful tool to uncover inefficiencies and detect issues before they impact your business. But success doesn't start with the technology—it starts with the right use case. In this session, we'll walk through the key steps to defining a meaningful AI use case within your JD Edwards environment, including a live demo of Oracle Machine Learning. You'll learn the basics of machine learning, how to identify where AI can drive the most value, and what makes a use case actionable.
2:30	8	Medius	Unlocking AP Efficiency & Eliminating Risk in JD Edwards with Medius	Medius delivers comprehensive AP automation and payments solutions that drive control, visibility, and efficiency across the entire invoice-to-pay process. By leveraging advanced AI and machine learning, Medius eliminates manual touchpoints, reduces cycle times, and minimizes the risk of errors, duplicate payments, and fraud. Medius is a premier AP automation partner for JD Edwards, with 35+ Medius customers utilizing our solution to bring autonomous AP to this highly complex ERP environment. Through our strategic partnership with Circular Edge, we're leading the charge in helping JD Edwards customers modernize AP, reduce risk, and unlock process efficiencies. With seamless ERP integrations and deep analytics, Medius empowers organizations to free up resources, improve working capital, and drive long-term financial resilience.
3:00	9	QuickLaunch Analytics	Business Analyst Survival Guide: Everything You Need to Know for Harnessing Your JDE Data	Tailored for JDE business analysts, this practical session is a survival kit for mastering JDE data workflows without the need for rocket science. Learn how to: Automate JDE data processing and refresh; Establish a single source of truth with centralized business logic; Empower users with mobile-ready dashboards for any device.
3:30		SCUG	It's a wrap!	Giveaways - Happy Hour
